

prodigy HSR

HARD SURFACE RESTORATION

The PRODIGY HSR from Power Plus is the most powerful and versatile truck-mounted machine ever made.

Tile and Grout

Graffiti Removal

The Prodigy™ Created specifically to handle the rigorous demands of **Hard-Surface Cleaning and Restoration Professionals**, the HSR has been engineered to provide five times the power and pressure of any other machine on the market today.

Restoration Power: With a 4.8 gallon per minute high pressure water pump (that's 2 gallons per minute more water than our standard Prodigy), three Stainless Steel heat exchangers (inside and out), a Stainless Steel exhaust and waste tank (to deal with the corrosive chemicals used in cleaning and decontamination), a larger pump and a bigger motor than before, there's no comparison.

The "PRODIGY HSR" stands alone as the most powerful, most versatile truck-mounted machine you can buy.

The Hard Surface Monster: The increased pressure and heat of the HSR allows you to do "Clean and Capture" (hard-core pressure washing within the confines of the cleaning head). Now you can clean carpets, stone, tile, grout, and also do Hydro-jetting (plumbing) and Hard Surface Cleaning all with one machine!

State of the Art Technology: The "PRODIGY HSR" utilizes the patented **SOVC vacuum-doubling system** alongside 3 stainless steel heat exchangers to produce a whopping **12,000 PSI** of cleaning power.

If you're going to invest in the best truck-mounted carpet cleaning and hard surface restoration machine out there, you need the feature-rich, industry standard; Prodigy HSR.

Prodigy from Powerplus – Power made easy

POWERPLUS

Your One-Stop Source for every professional cleaning need.

prodigy HSR

Use Your Prodigy HSR For:

- Hard Surface and Stone Cleaning
- Carpet, Upholstery, Dry, and Duct Cleaning
- Fire / Flood Damage Restoration
- Asbestos / Mold Abatement
- Bio-Hazard / Haz-Mat / Decontamination
- Clean-n-Capture
- Pressure, Graffiti and Window Washing
- Aviation / Auto Detailing
- Hydro-Jetting and Plumbing
- Raw Sewage, Waste Disposal, and Mud Pickup

Markets The HSR Serves:

- Hard Surface and Stone Care, Floor Staining
- Contractors, Developers, Engineering, Excavating
- Fast Food, Restaurants, Grocery Stores, Gas Stations
- Fire and Flood Damage and Restoration
- Homes, Hotels, Property Management/Owners,
- Schools, Carpet Cleaning
- Federal and State Agencies, Convention Centers, Arena's, Industrial Parks
- Manufacturers, Bio-Hazard, HazMat Cleanup, Moving Companies, Painters, Pavers, Roofers
- Storage Facilities, Railroads, Trucking and Waste Disposal

PERFORMANCE FEATURES

Pressure: 12,000 PSI System 3,000 at the Jet

Pump Volume 4.8 gallons per minute

High Output Blower

PHYSICAL SPECIFICATIONS (STANDARD):

Dimension: 34.5W X 40H X 42D (includes waste tank)

Weight: 470 lbs

Frame: Power Coated High Strength Steel

Engine: 23 HP OHV

Water Pump: 4.8 GPM

Heating System: 3 Stainless Steel Heat Exchangers

Recovery Tank: 70 gal Stainless Steel

Ignition: Electronic Ignition

Instruments: Marine Gauges

Wand: S Bend Stainless Steel w/Bypass

Hoses: 275 ft Vacuum and Solution Hose

Reel: 350 ft Dual Reels

OPTION PACKAGES:

- Auto Pump Out
- Liquid Cooled Engine
- Silencing Package
- Water Softeners

FINANCING & OWNERSHIP SOLUTIONS

- Payment Plans
- Training Videos
- Long-term rentals
- On-Site Service

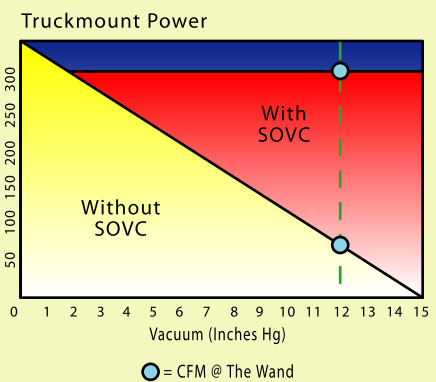

what is SOVC™?

SOVC* is a revolutionary patented product from Tsunami Cleaning Technologies that doubles the suction power of any truckmount and cuts dry times by 50%.

How does SOVC do that? SOVC digitally controls the pressure relief valve common to all truckmounts. Typical pressure relief valves begin to open as soon you begin cleaning.

As the chart below illustrates, the more stress you put on the truckmount (to achieve a shorter dry time), the more the relief valve opens and the greater the loss of suction power, or CFMs.

The SOVC kit replaces the manual relief valve with an electronically-controlled valve system that safely maximizes the suction power of your truckmount. As the chart below shows, SOVC delivers a massive power boost and cuts dry times dramatically.

*SOVC or Solenoid Operated Valve Control. SOVC is a trademark of Tsunami Cleaning Technologies. U.S. patent nos. 5,987,696 and 6,176,940B1. Multiple foreign patents pending
